VERBAL DESCRIPTION:

Fragment of the top portion of a solid, hand-made, cylindrical pendant. The top is broken, but the upper sides of it appear to have been rounded. There is a definite "neck" - an indentation between the pitted, punctated upper portion & the smooth, cylindrical lower portion. There is fine chert below the neck (which is 1.3cm below the top of the fragment). The lower portion is very smooth. No paint slip etc.
